Excerpts from ODP Div/Staff Reports for Week Ending 2 June 1983

Management Staff

Finance. As of 1 June, there were 43 outstanding advances with a dollar value of \$30,300. No accounts were delinquent.

[redacted]

25X1

Federal ADP Users Group (FADPUG) Meeting. On 26 May, the FADPUG Special Interest Group on Microcomputer Applications and Technology (SIGMAT) sponsored a presentation addressing two new microcomputer procurement vehicles: (1) the GSA Information and Training Product Center (operational 1 September 1983) and (2) GSA Schedule C. The former is a computer store operated by a vendor under contract to GSA and the latter are GSA negotiated price lists. These non-mandatory procurement vehicles should present advantages in terms of: (1) cost savings over vendor list prices and (2) convenience. All applicable Federal Procurement Regulations and Federal Property Management Regulations must be satisfied prior to utilizing these vehicles.

25X1

1983 Unfunded Requirements. Processing and Applications have been requested to update their unfunded requirements for the remainder of the year. It is very unlikely that discretionary unfunded requirements will be supported. Currently, we do not have a hard--must be done, no alternative--requirement for 1983 funding.

25X1

Proposed Headquarters Notice - Magnetic Media Control. Management Staff responded to an Information Systems Security Group, Office of Security (ISSG/OS), proposed Headquarters Notice for Control of Portable Magnetic Media. ODP components formally commented on the need for a policy on the control of magnetic media but suggested ISSG consider alternate methods of verification of data for media sent outside of the Agency and that the label on the media reflect the true classification of the data it contains.

CONFIDENTIAL

[] EOD'd as a Summer Only for MS on 23 May. 25X1

[] is on LWOP as of 27 May. She 25X1
joined her husband overseas.

[] EOD'd as a Summer Only in PD on 31 May. 25X1

[] EOD'd as an Urban Fellow in ED on 31 May. 25X1

[] EOD'd as a Graduate Fellow in SDD on 25X1
1 June. [] 25X1

Special Projects Staff

The mail profiles for the first 21 DIA users have been activated and mail is being disseminated to their mail files in preparation for the first DIA class on 6 June. [] 25X1

Site surveys of SAFE contractor facilities were performed in preparation for connecting terminals and printers at the contractor facilities to the unclassified SAFE development computer system. Access to the development system is expected by 1 July. [] 25X1
[] 25X1

Applications

Community-Wide Computer Assisted Compartmentation Control System (FOURCEE). ODP Engineering and the SSD 4C contract team continue the effort to speed up 4C software procedures. A software change (removal of a sort procedure) on community accesses decreased the execute time from 4 minutes to 35 seconds. Other related tests are currently being performed by this group. [] 25X1

Processing

On 28 May the 3033MP was picked up by Burnham Van Lines and returned to IBM. [] 25X1

Personnel:

[] returned to work on 31 May following an 25X1
operation.

[] has been working with ISSG/OS in augmenting their 25X1
Audit Program. ISSG/OS now has an automated capability of tracking and monitoring all GIM systems security violations. The Data Base Control Center (DBCC) electronically transfers all of the GIMS violation records to the ISSG system on a weekly basis. [] 25X1
[] 25X1

CONFIDENTIAL

The unclassified MVS system for the Northside Computer Center has been IPL'd and is running under VM. Currently the MVS system is being tailored to meet the requirements of running under VM. [REDACTED]

25X1

There is now a single Batchmon running in the VM1/VM2 complex instead of a Batchmon running on each system. Users are able to get their job status independent of which machine they were on when they submitted the job. Also JES3 now returns the status and job output to either VM processor and will not hold it if the originating VM processor is unavailable. [REDACTED]

ODP 83-794
2 June 1983

MEMORANDUM FOR: Deputy Director for Administration

FROM:

[REDACTED]
Director of Data Processing

STAT

SUBJECT: ODP Report for Week Ending 3 June 1983

1. Security Access Central System (SACS)

The Information Systems Security Group, Office of Data Processing (ISSG/ODP), briefed the Chief, Headquarters Security Branch (C/HSB/OS) on how the SACS minicomputer is used for access to the [REDACTED] Special, and Northside Computer Centers. The ISSO/ODP has access to the Central Badge and Credential System (CENBAD), the database source for SACS, and is able to amend the database to add or delete access to the centers. Also, C/HSB/OS was advised of the intended use of SACS for the implementation of the Document Logging System (DLS) in ODP computer centers and briefed on DLS and how it will be used. Since it is expected that SACS will be used for additional controls, OS is looking into upgrading the SACS computer system.

STAT

2. Excess Equipment

An excess ODP-owned PDP 11/34 computer system was transferred to the Office of Communications (OC) to host the Communications Equipment Monitoring System (CEMS). The system was originally acquired, at a cost of \$149,000, for use as a Technical Analysis and Display System (TADS) graphics workstation.

3. Deputy Director of Central Intelligence (DDCI)

Mr. John McMahon (DDCI) toured the Northside Computer Center on 27 May.

4. Wangs for [REDACTED] Building

A survey was conducted on 24 May at the [REDACTED] Remote Computer Facility to review the present equipment layout and find sufficient space for the proposed installation of five Wang Alliance Systems required to support OC. The survey results found adequate space for the proposed equipment without reconfiguring the current systems.

5. GIMS Users Group Hosted by ODP

Data Base Systems Branch (DBSB) hosted a meeting of the GIMS Users Group on 1 June. Personnel from the Federal Bureau of Investigation (FBI) and the Federal Aviation Administration (FAA) were in attendance. The main purpose of the meeting was to provide the FBI and the FAA with information about GIMS Software Releases 4.3 and 4.5.

6. Significant Events During Coming Week

The Northside Computer Center is scheduled to have a total site chilled water and steam outage from 1800 hours on 3 June through 2400 hours on 5 June. The outage, which will require the SAFE system to be powered off, is for a General Services Administration contract to install a new cooling tower cell at the Headquarters power plant and to install new utility lines to the north side of the Headquarters Building. DDI SAFE users have been warned of this outage.
